Abstract

These instructions give you guidelines for preparing papers for the Journal of Computer Science & Technology. The abstract should summarize the content of the paper. The abstract should be below 200 words. Do not make references nor display equations in the abstract. The journal will be printed by photo-offset from the same-sized copy prepared by you. Your manuscript should be printed on A4 paper (21.0 cm x 29.7 cm). It is imperative that the margins and style described below be adhered to carefully. This will enable us to keep uniformity in the final printed copies of the Journal. Please keep in mind that the manuscript you prepare will be printed as it is received. Readability of copy is of paramount importance.

Keywords: Enter key words or phrases in alphabetical order (5 maximum), separated by commas.

Received 4 December 2014; Revised 7 May 2015;
Accepted 17 June 2015

1 Important information

The submitted papers must be original. Do not submit a reworked version of a paper you have submitted or published elsewhere. Do not publish preliminary data or results. The submitting author is responsible for obtaining agreement of all coauthors and any consent required from sponsors before submitting a paper. The authors must cite relevant prior work. There is a limit of 7 pages for each paper in the Journal. Each submission should be a .pdf file submitted through the JCS&T management system.

2 Preparation of manuscript

2.1 General appearance

The text must be in English. The submitted typeset scripts of each contribution must be in their final form and of good appearance since they will

be printed with minor edition. It is essential that the *camera-ready copies* be absolutely clean.

Your paper must be printed in two columns. Columns should be balanced in the last page. The document you are reading is printed in the format that should be used in your paper.

2.2 Specification

To ensure uniformity of appearance for the Journal, your paper should conform to the following specifications. If your paper deviates from these specifications, the printer may not be able to include your paper in the Journal.

1. The top, bottom, left, and right margins should be 2.5 cm.
2. The distance between the two columns of text should be 1cm.

3 Font size

The font size must be 10 points. This document is set in 10-point. Some technical formatting programs print mathematical formulas in italic type, with subscripts and superscripts in a slightly smaller or bigger font size. This is acceptable.

4 Major headings

Major headings are to be left-aligned, in a bold font without underline and must be numbered. For example, the text **4. Major headings** at the top of this paragraph is a major heading.

4.1 Subheadings

Subheadings should be in a bold font and start at the left-hand margin on a separate line.

4.2 Sub-subheadings

Sub-subheadings should be in a bold font and left-aligned too.

5 Illustrations

The illustrations can be in color. However, because printed version will be in black and white, you must ensure a clear view in grayscale. All illustrations must have a DPI of 200 or more. The caption must be placed *after* the graphic. All figures must be mentioned in text, like this Fig. 1.

Figure 1: Sample image

6 Formulae

All equations must be typed or written neatly in black. They should be numbered consecutively throughout the text. Equation numbers should be enclosed in parentheses and flushed right. Equations should be referred to as Eq (1) in the text where 1 in this case is the equation number.

$$(1+x)^n = 1 + \frac{nx}{1!} + \frac{n(n-1)x^2}{2!} + \dots \quad (1)$$

In multiple-line equations, the number should be given on the last line.

$$(1+x)^n = 1 + \frac{nx}{1!} + \frac{n(n-1)x^2}{2!} + \dots$$

$$= \sum_{i=0}^n \binom{n}{i} x^i \quad (2)$$

If you are using Word, use either the Microsoft Equation Editor or the MathType add-on (<http://www.mathtype.com>) for equations in your paper. If you are using LaTeX, the AMS mathematical packages are highly recommended for typesetting complex formulas.

7 Tables

Tables must be in black and white and must not contain vertical lines or borders. The caption must be placed before the table and is obligatory. All tables must be mentioned in text, like this Table 1.

Table 1: Sample table

D (in)		P_u (lbs)	σ_N (psi)
5	test 1	285	38.00
	test 2	287	38.27
	test 3	230	30.67
10	test 1	430	28.67
	test 2	433	28.87
	test 3	431	28.73

8 Page numbering

Please do NOT number your pages.

9 Foot notes

Should be typed in singled-line spacing at the bottom of the page and column where it is cited. Footnotes should be rare.

10 Conclusions

The better you look, the better we all look. Thanks for your cooperation and contribution.

11 References

List and number all bibliographical references at the end of your paper. When referenced in the text, enclose the citation number in square brackets, for example [1] or [2, 3, 4, 5]. The preferred citing package in LaTeX is bibtex.
